Part 1
core definitions
3 defs: postVar, gain, optVar
Part 2
core theorems (the student's)
6 proofs
Part 3
model definitions
11 defs: updErr ... generator
Part 4
proofs for S, O, W, H0, H
14 proofs
Part 4b
proofs for F (filter)
10 proofs
Part 4c
proofs for M (switching)
2 proofs
Part 5
proofs for A, D, F5 (random variables)
6 proofs
Part 6
the final statements, spec_*
17 statements, each proved in one line
each Part 6 theorem cites one lemma from a proof Part
